

PUIPUIA LE OLA

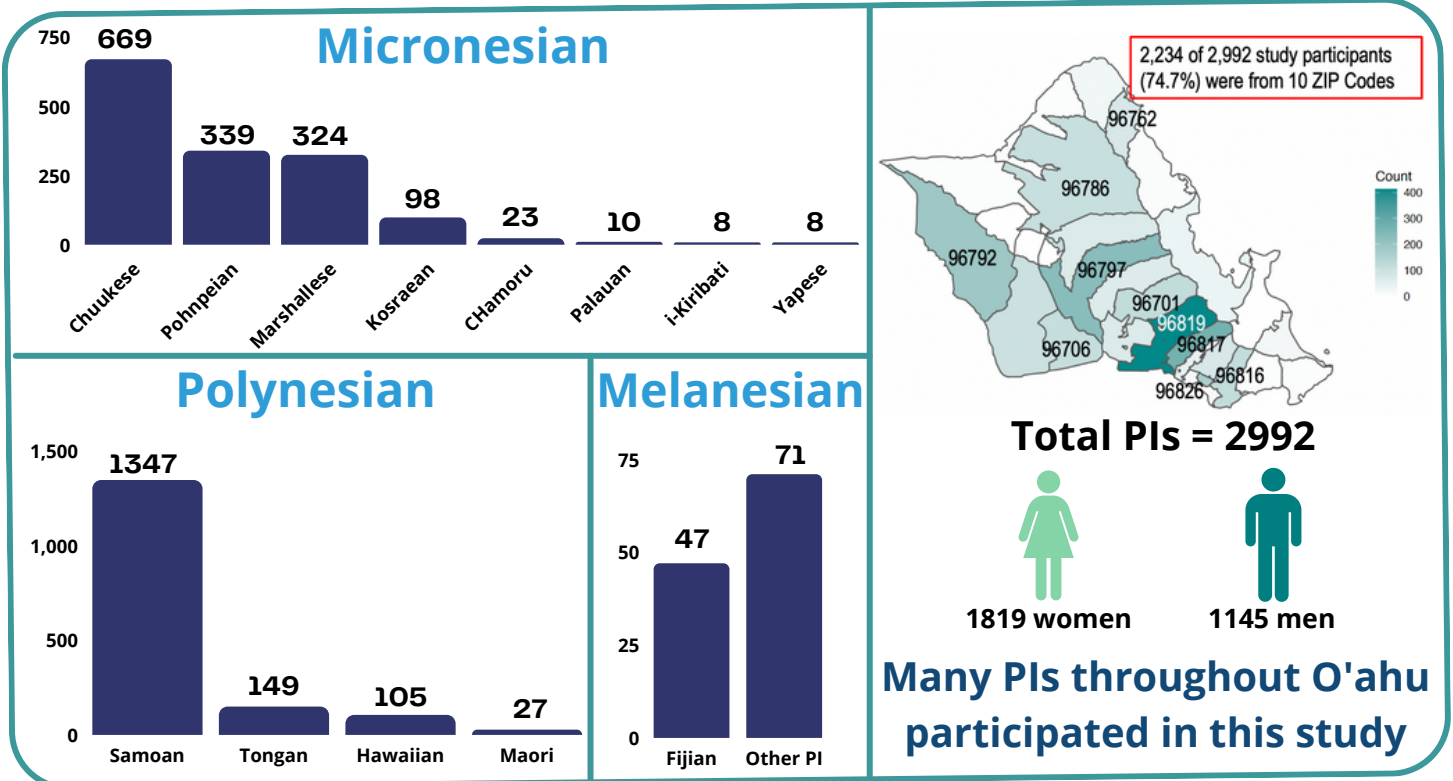

PROTECTING LIFE STUDY

PROJECT GOAL : Helping Pacific Islanders get tested for COVID-19 through learning sessions

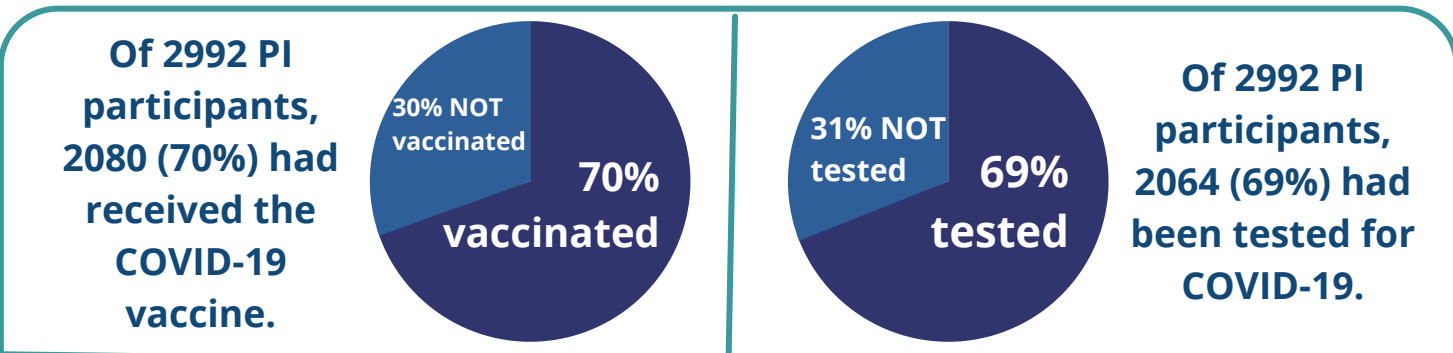

IMPACT OF COVID-19 ON PACIFIC ISLANDERS IN HAWAII

Pacific Islanders (PI) in Hawai'i have been heavily affected by COVID-19. PI who have other health conditions, such as diabetes, high blood pressure, and obesity, are at increased risk of severe COVID-19. There is a need for COVID-19 testing responses for PI communities.

WHAT ARE THE STUDY RESULTS SO FAR?

IN THE BEGINNING OF THE STUDY...

DURING THE STUDY...

Of 1051 PI participants tested, 99% were **NEGATIVE** for COVID-19!

Information as of June 6th, 2022

HOW CAN I HELP PROTECT MY COMMUNITY?

- Ask a Field Research Assistant for a home COVID test kit
- Take a COVID-19 test regularly
- Encourage your family and friends to get tested!
