How can COVID-19 spread?

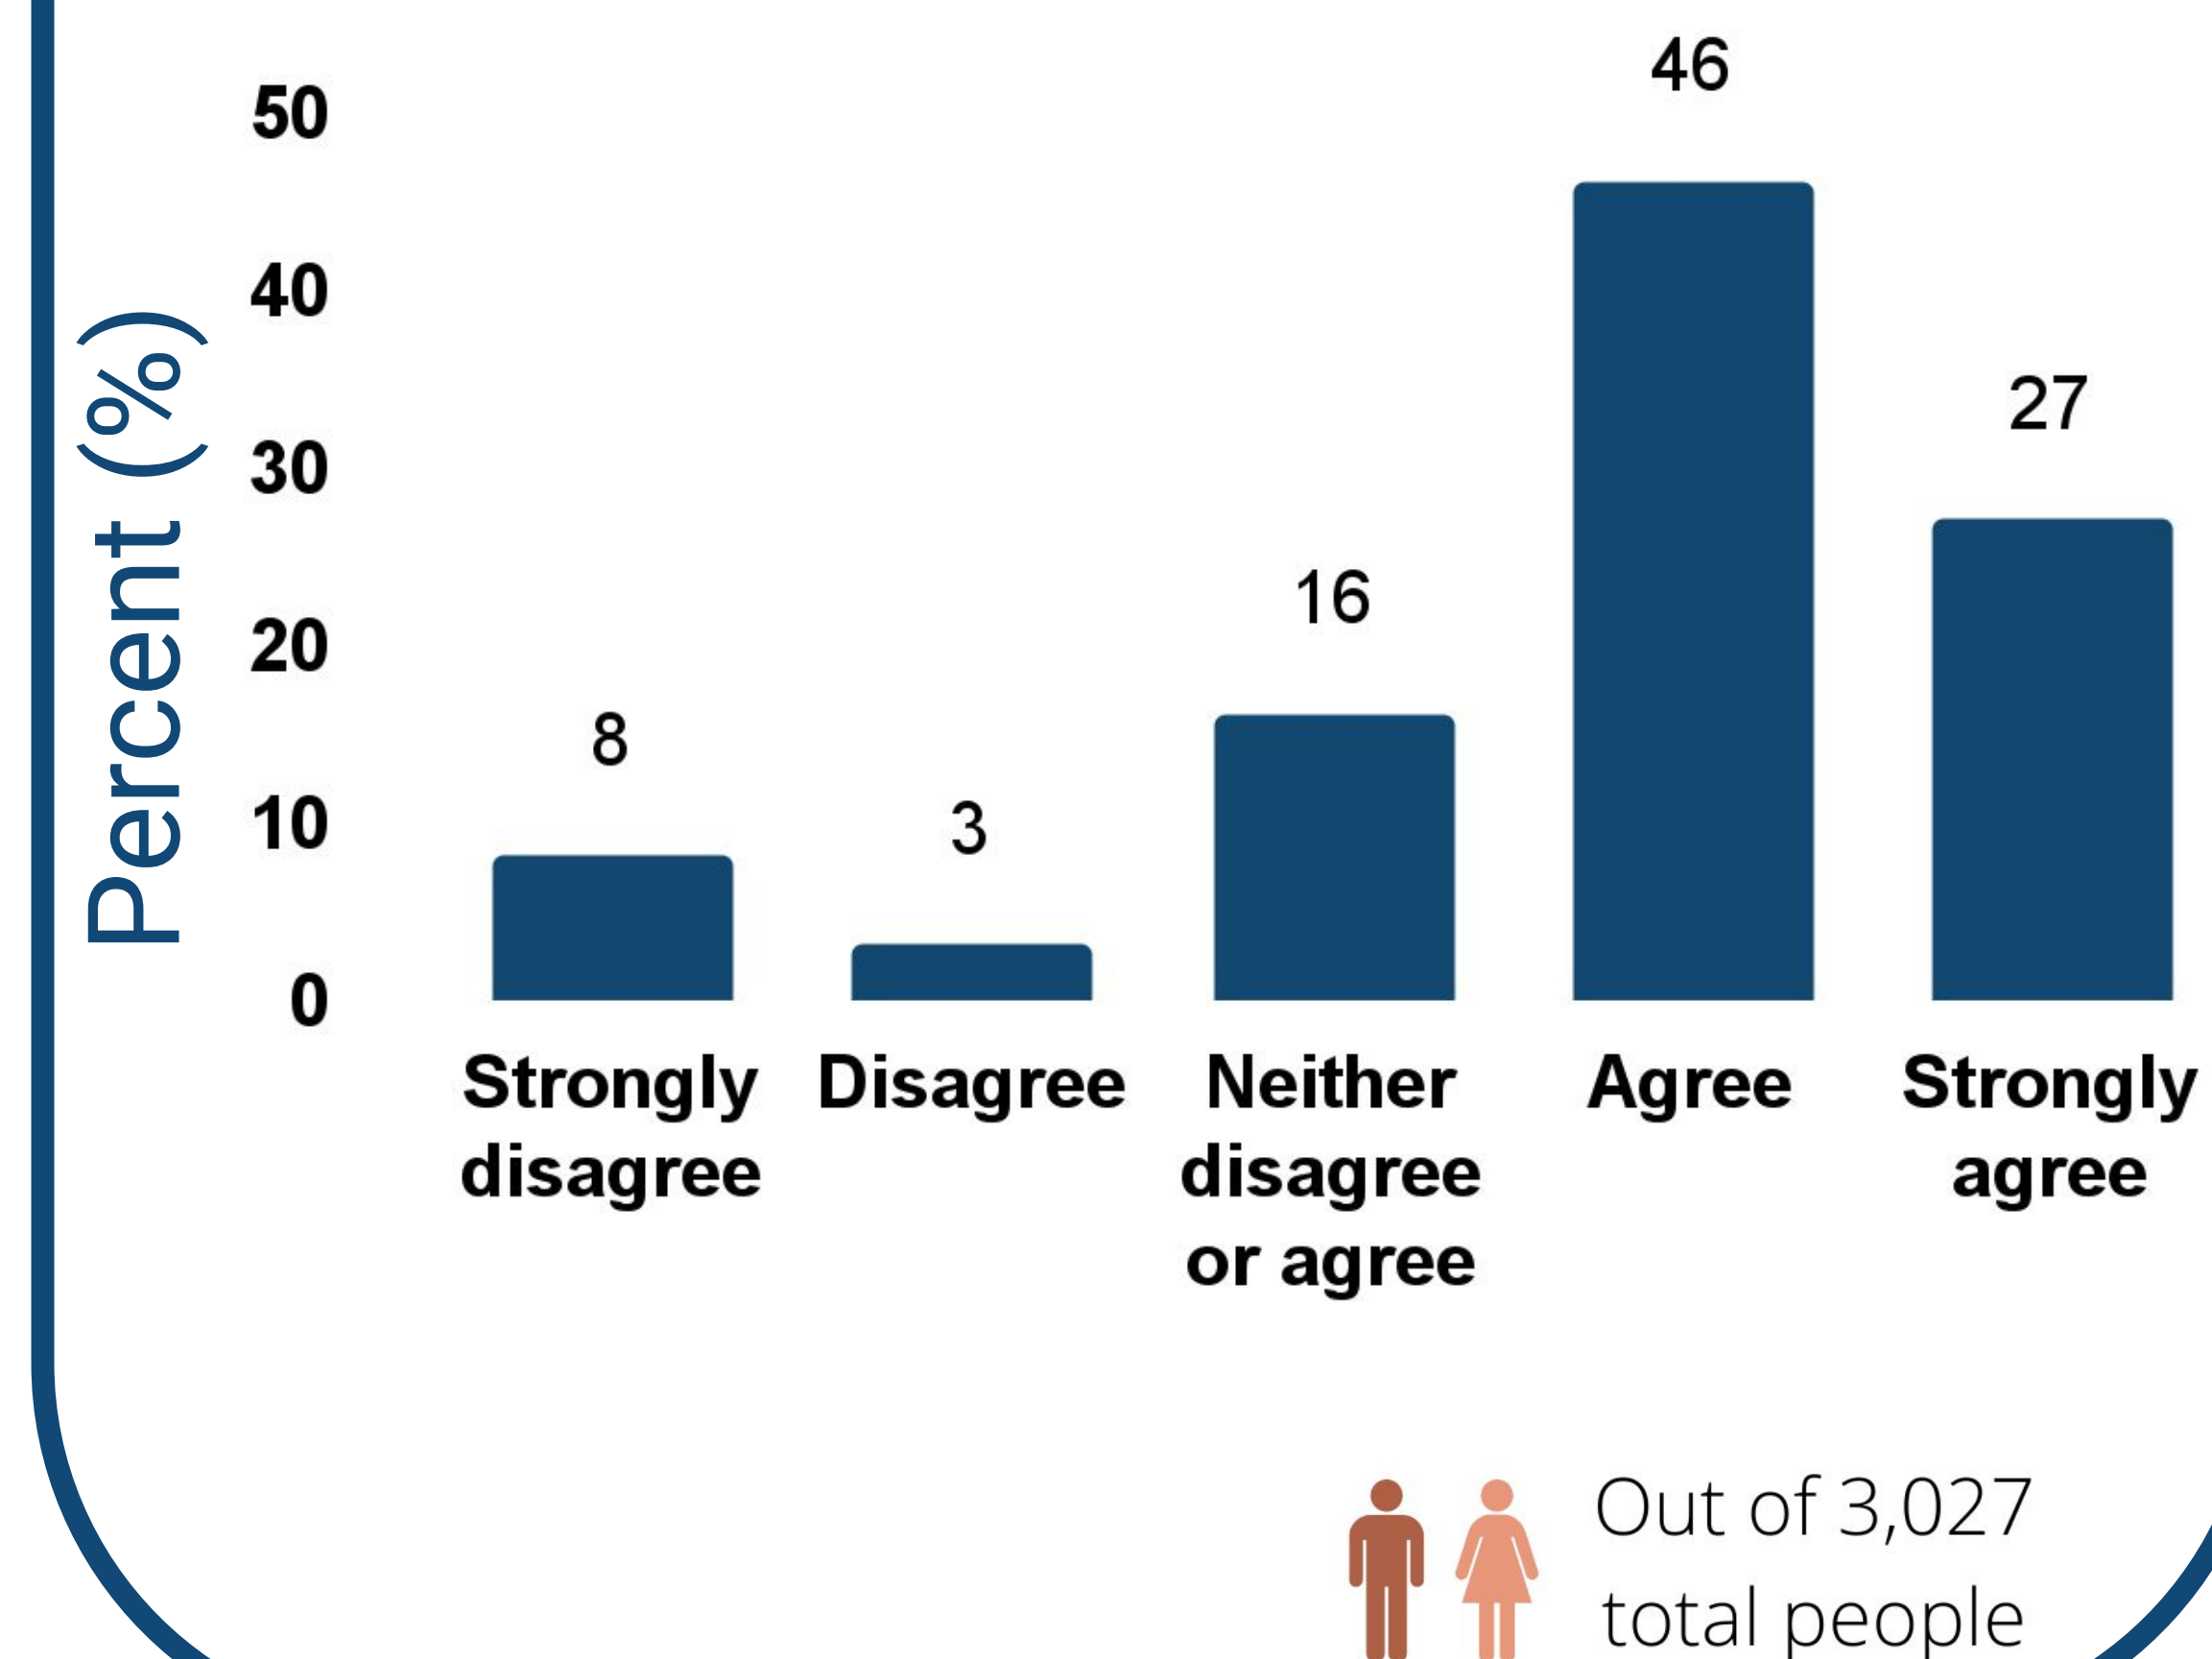

Sources of info about COVID-19

Perceived risk of COVID-19 infection

Access to COVID-19 testing

99%
out of 1,051
tested were
NEGATIVE
for COVID-19!

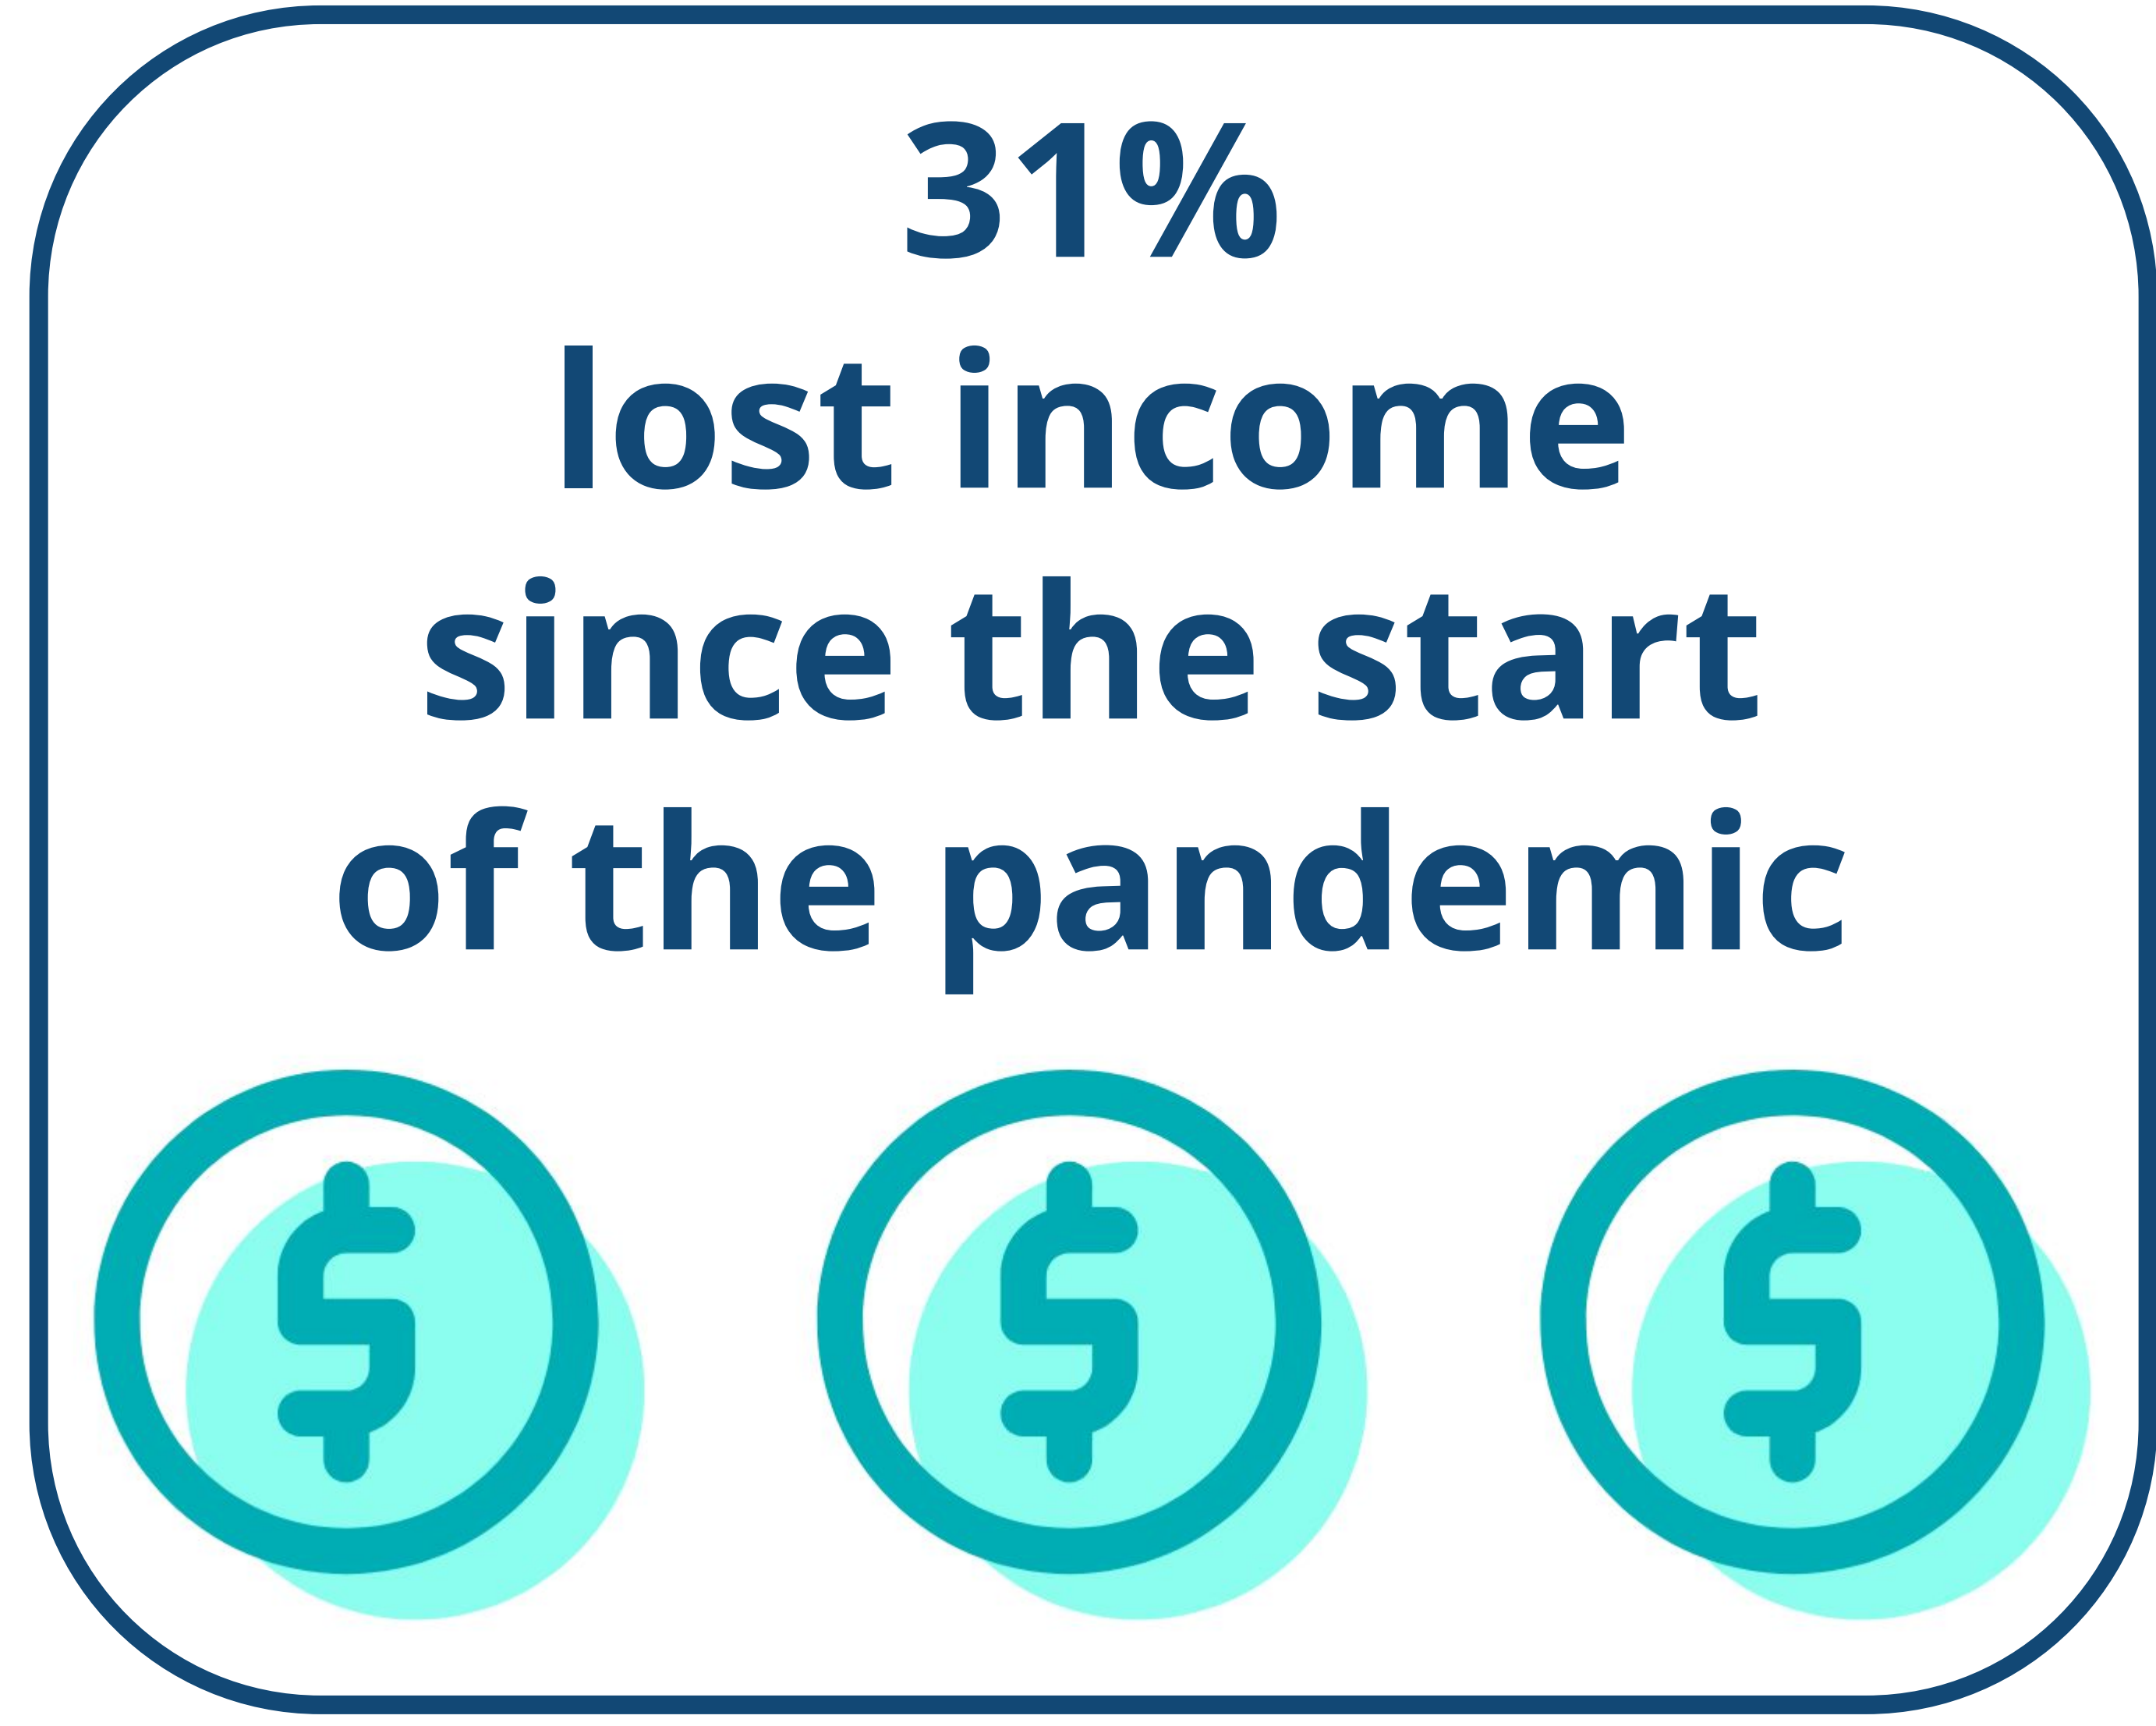

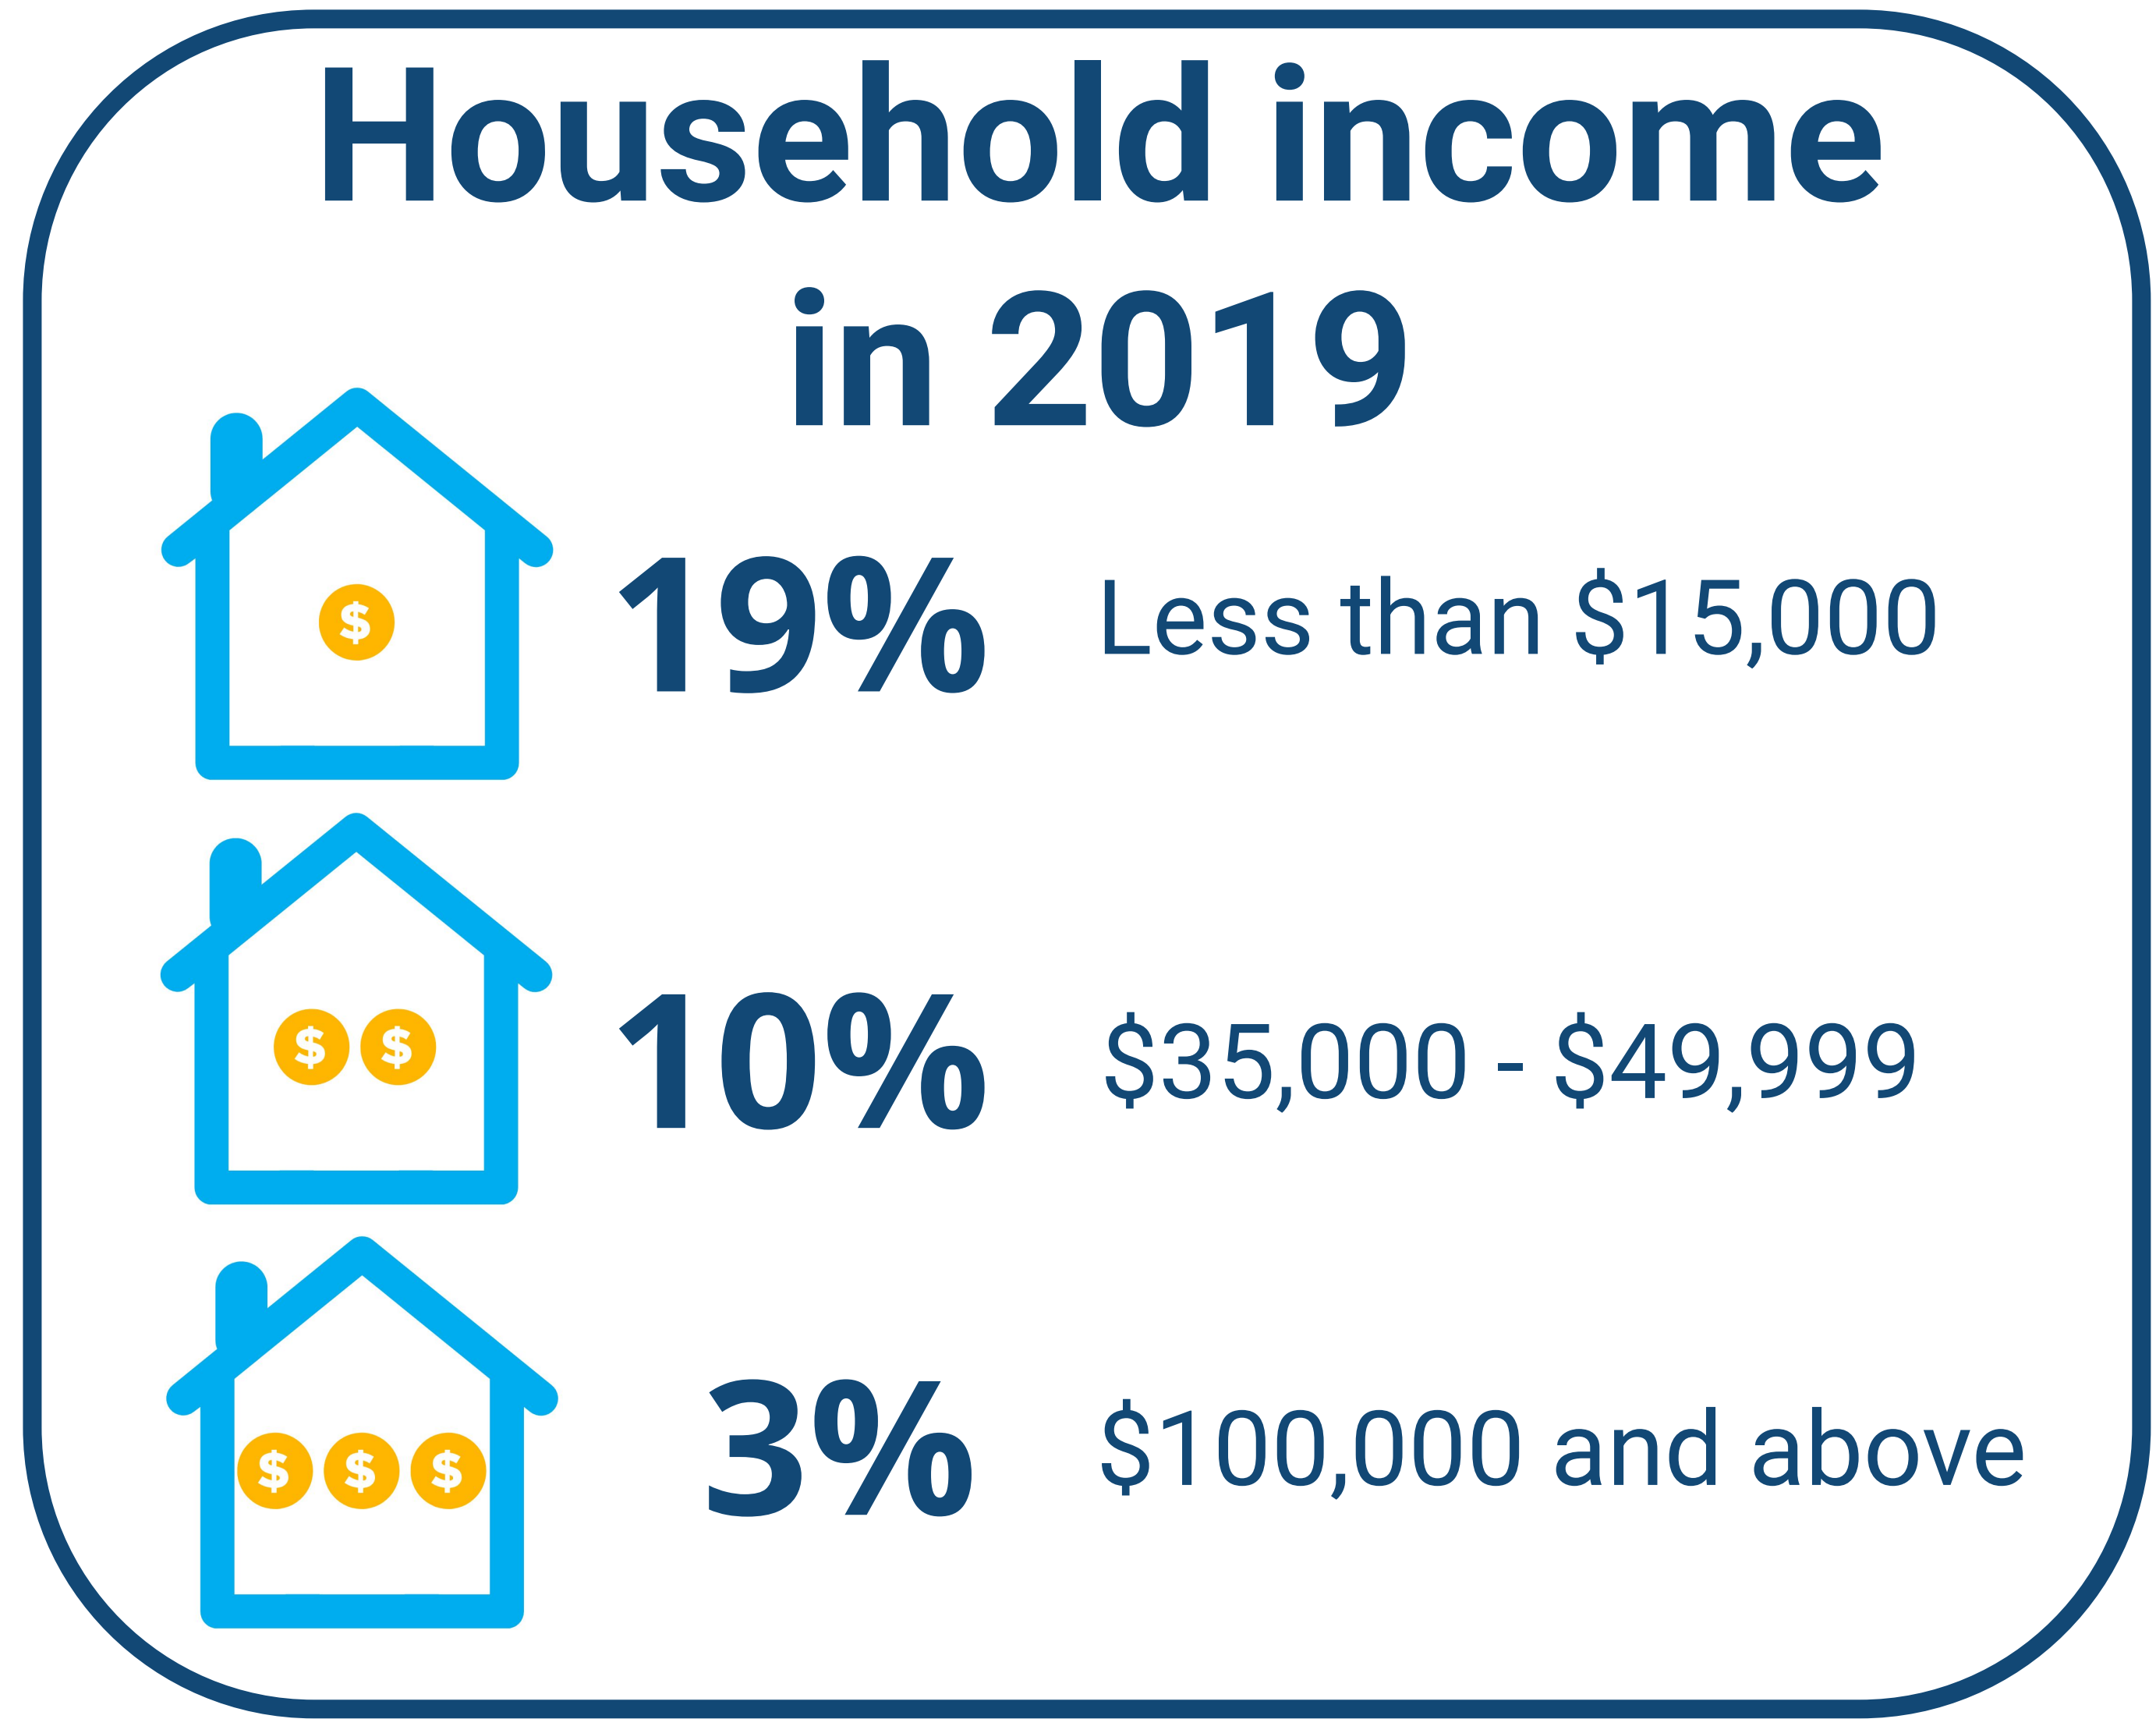

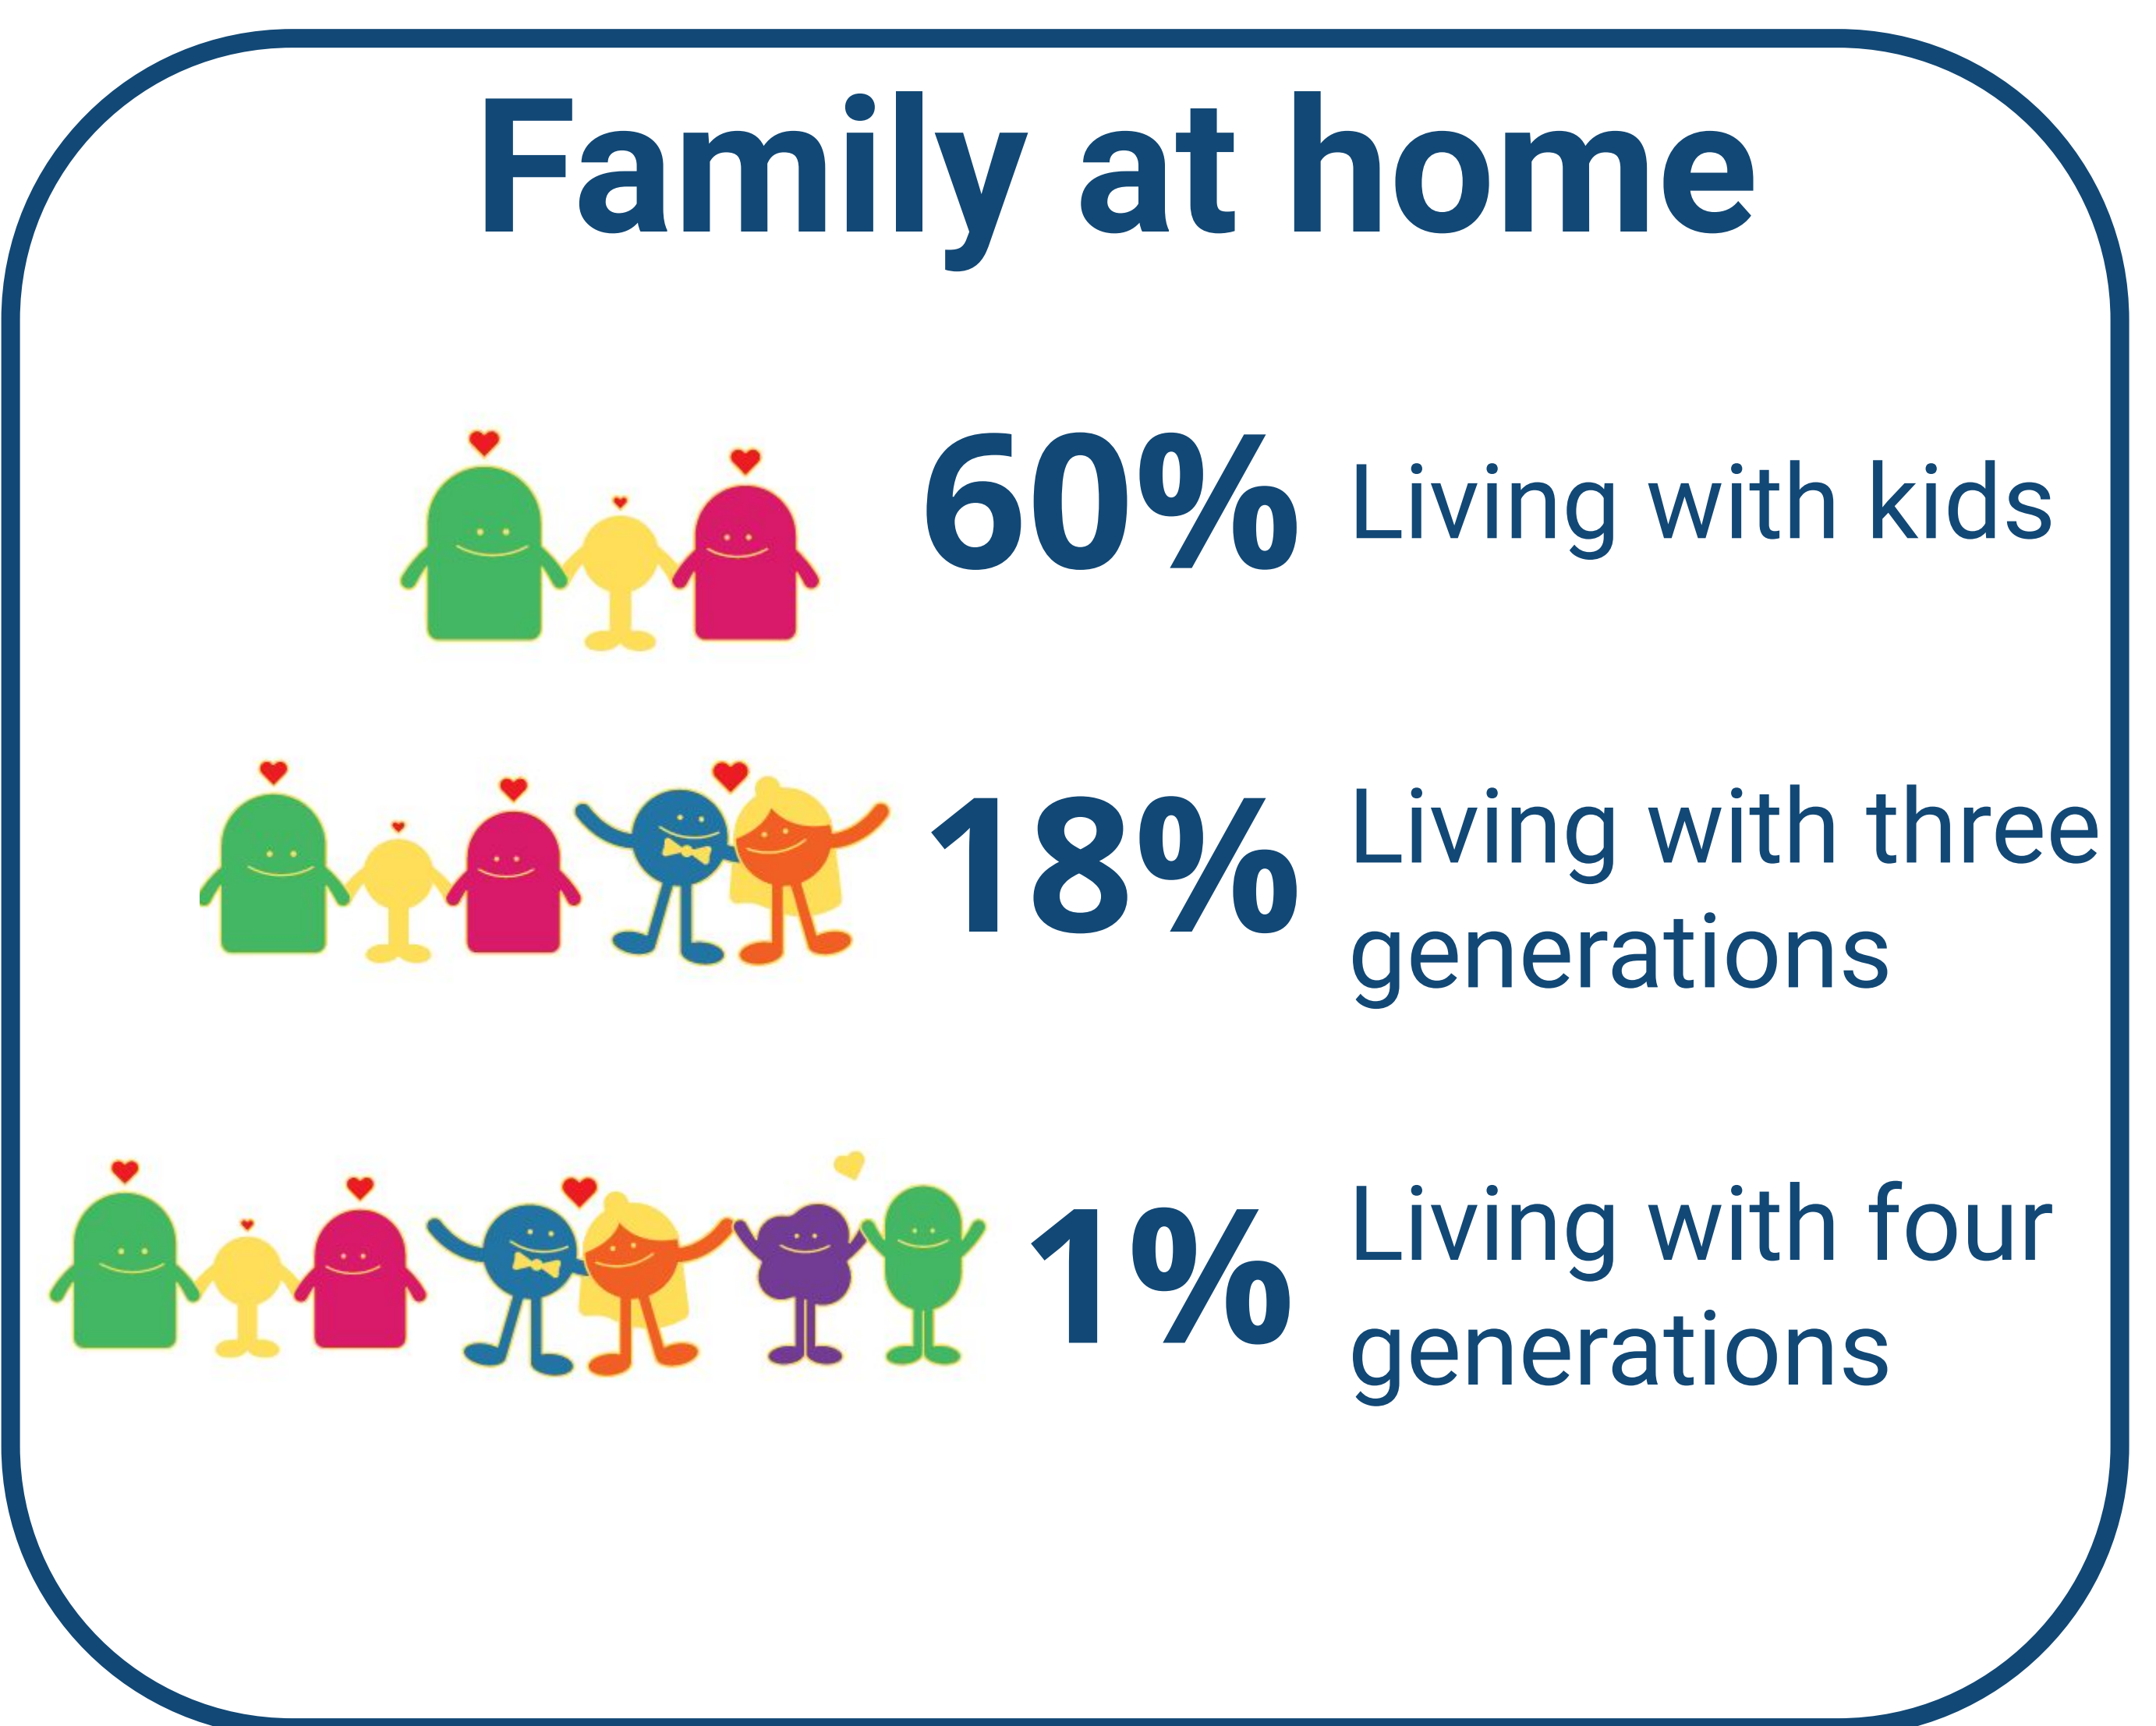

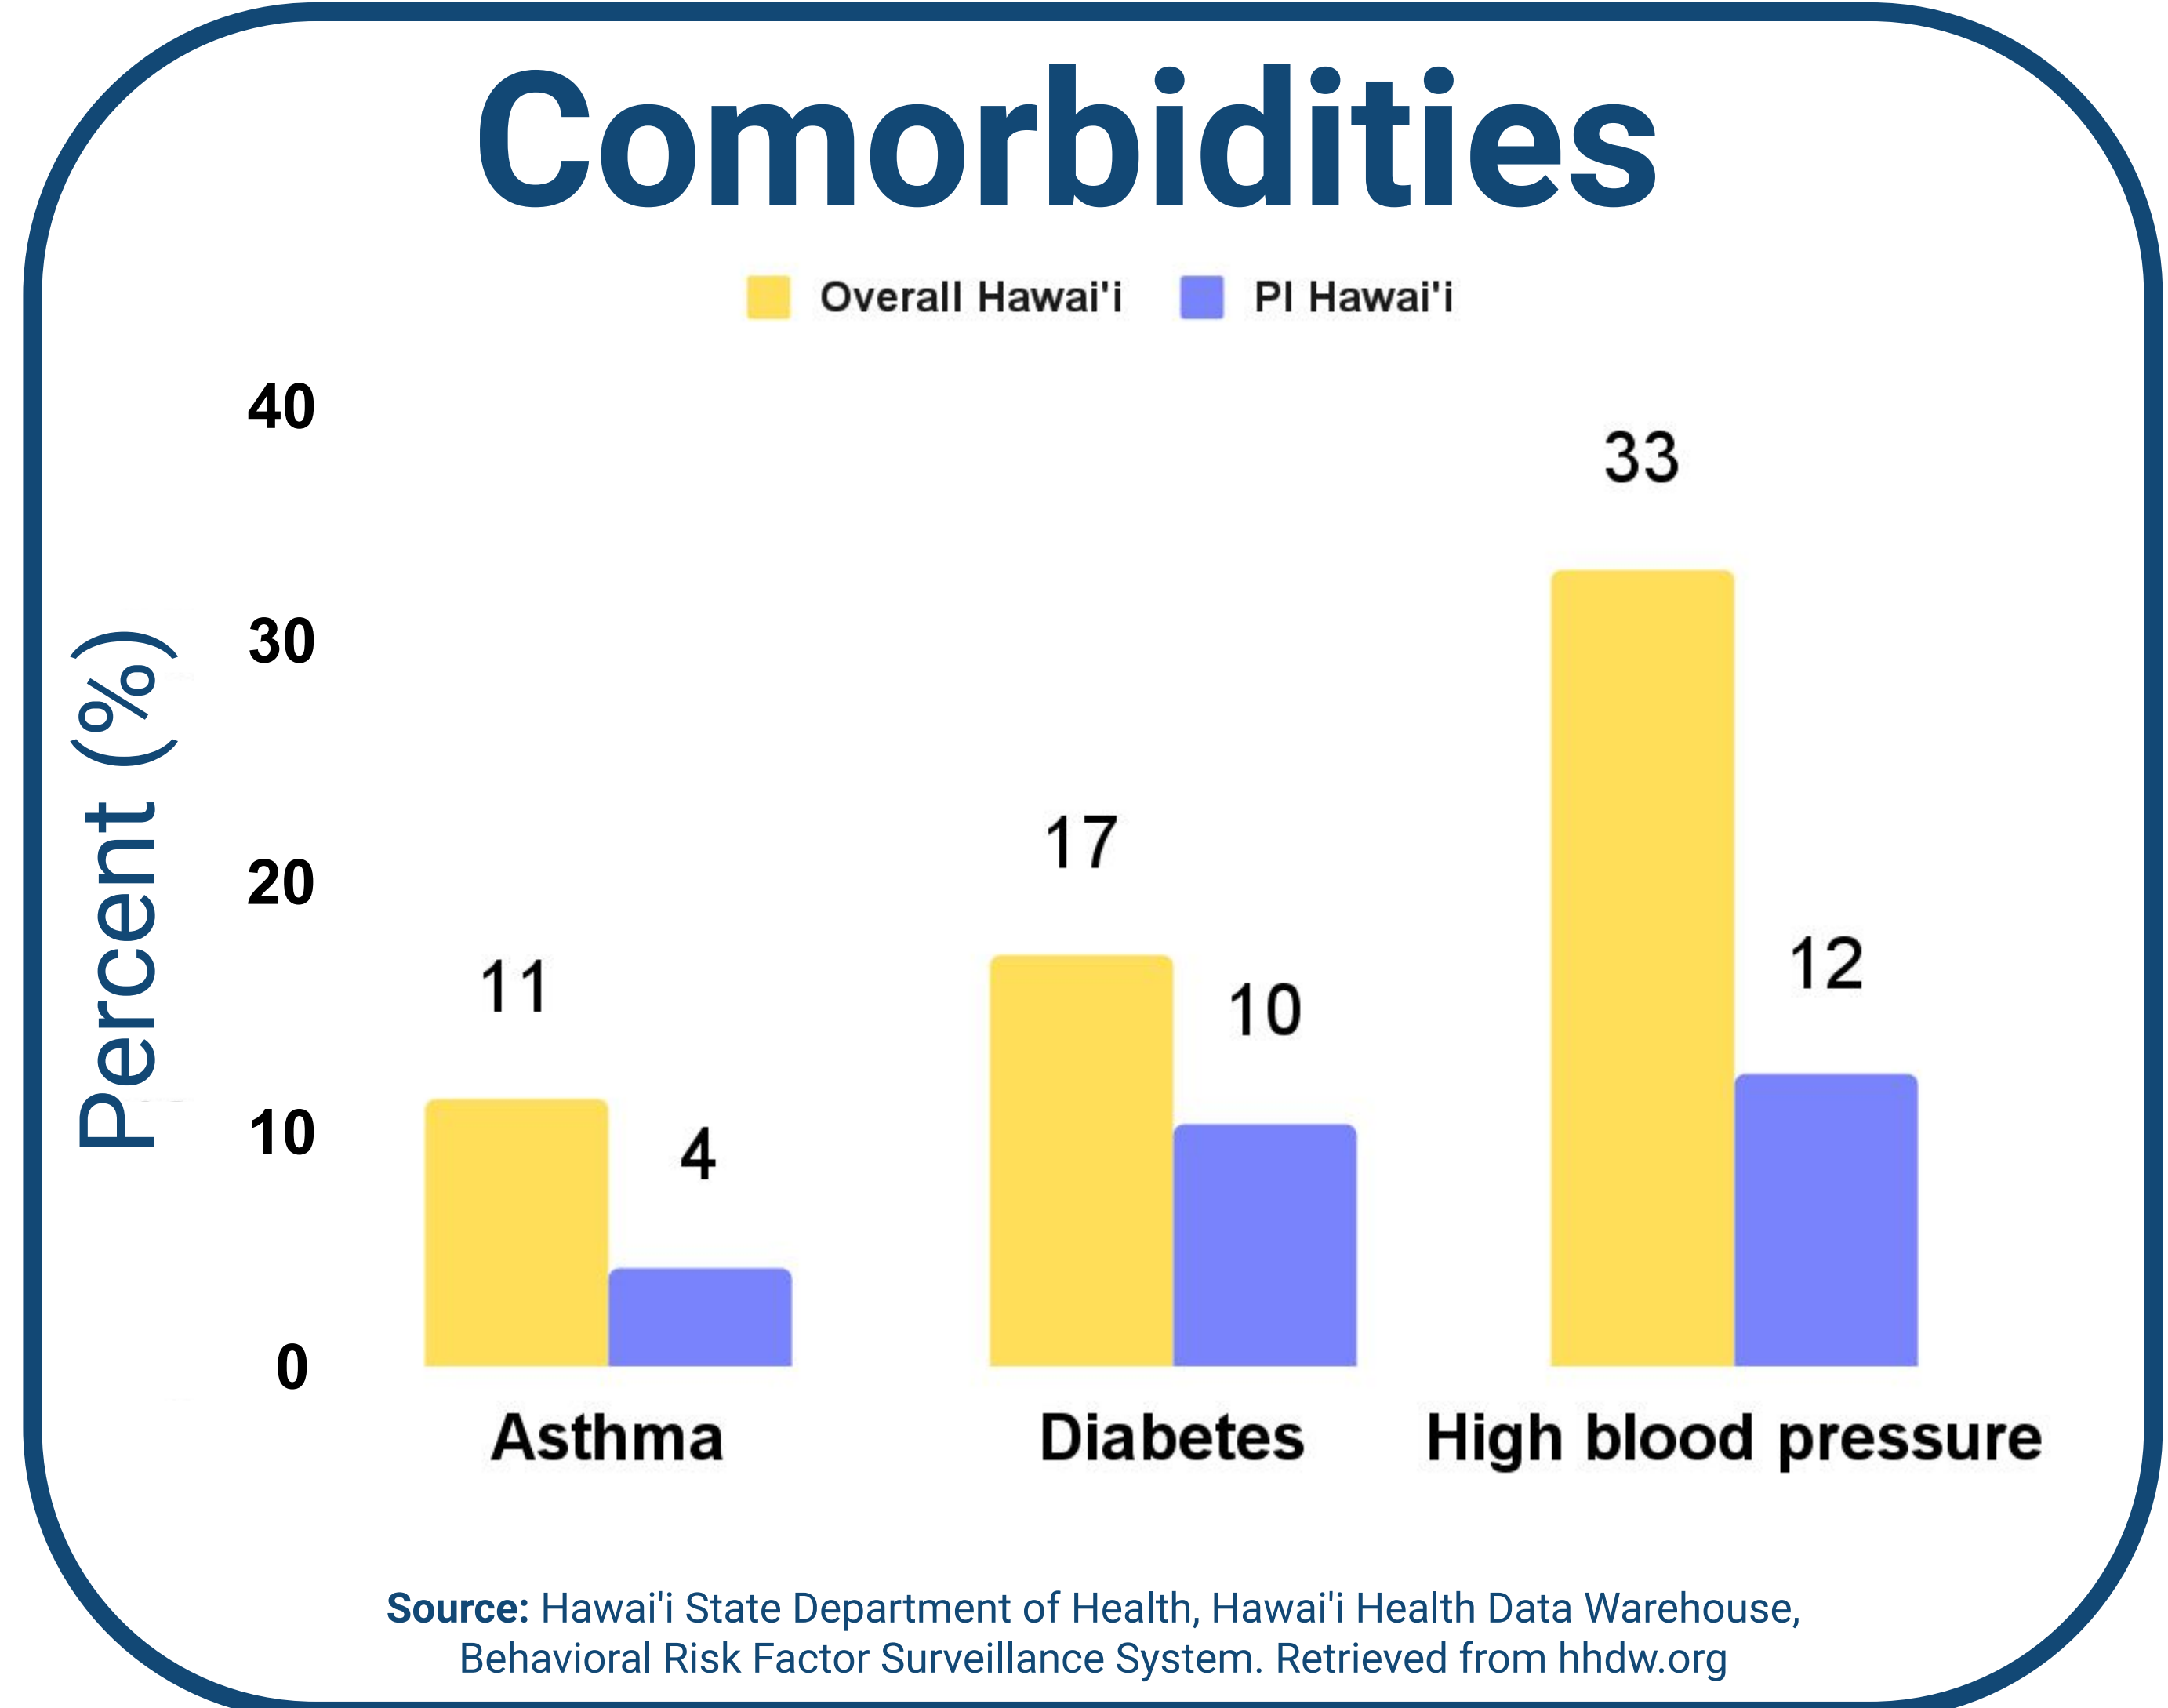

Health Disparities

Social Determinants of Health

What Can We Do?

Protect you, your family, & community

- Ask Field Assistant for a home COVID test
- Take a COVID-19 test regularly
- Encourage your family and friends to get tested!

“I joined the Puipuia le Ola research study because I want to make a difference in my community...only by understanding how and why infection rates are so high among Pacific Islanders, can we learn how to do something about it”

Hawai'i Pacific University Student,
Puipuia le Ola Study Participant

What the pre-survey results mean

- To protect, provide, & give PI a voice
- One of the few current results collected for PI
- Recommend resources and other needs for PI

Don't forget to take your *second* survey!

Talk Story

- Do you have questions?
- What do you want to know more about?
